2023

Dear Kristan,

***Progress Update - November 2023***

Stage 2 construction works commenced during August 2023. The project is progressing well with the use of two tower cranes and one concrete boom pump, with a second concrete boom pump to be installed by the end of November. Current and upcoming works include in-ground services, formation of pile caps, structural concrete pours for the building's basement and suspended slabs, and structural concrete pours for the building's cores.

Please see below, current image of the site.

Sincerely,

Justin Sut  
Project Manager
